## SECTION 2 – GENERAL RULES

### 2-024 - USE OF APPROVED EQUIPMENT

All electrical equipment shall be approved as per Rule [2-024](#) and Appendix B note with the exception as per Rule 16-222.

*Labels are required for manufactured homes and movable equipment wired under a Saskatchewan electrical permit.*

Skids and movable equipment that have been wired off site shall have a suitable, weatherproof if required, label affixed to the electrical panel or skid. The label shall include the Saskatchewan electrical contractor's name, the permit number that was issued for the installation and the date.

Manufactured homes [ready to move homes (RTM)] shall have a label affixed to the electrical panelboard or the inside of the kitchen cabinet. The label shall include the Saskatchewan electrical contractor's name, the permit number that was issued for the installation and the date. If you require labels, please contact your *Local Electrical Inspector*.

#### **Equipment approval certification**

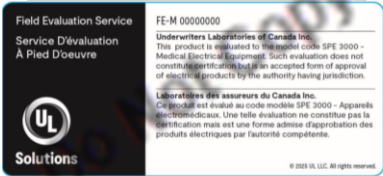

All electrical equipment requires an overall approval from a Saskatchewan recognized certification body prior to being sold, advertised, electrically connected or reconnected. This includes locally manufactured products, used or rebuilt equipment, solar powered generating units used for temporary construction power or lighting, and may also include mobile homes, and RTM's. For a complete list of approved certification bodies and certification marks, please visit the TSASK website at [www.tsask.ca](http://www.tsask.ca).

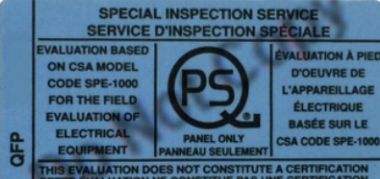

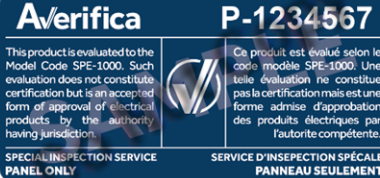

#### **Field inspection certification**

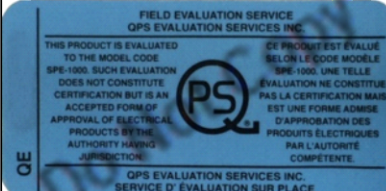

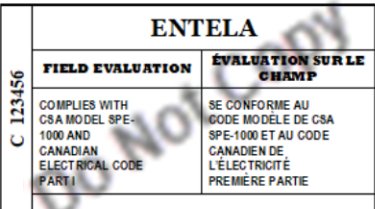

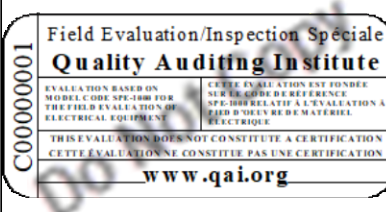

For a list of current recognized field certification labels for the Province of Saskatchewan, contact Electrical Inspections at our toll-free number 1-866-530-8599, or visit us online at [www.tsask.ca](http://www.tsask.ca).

#### **Field inspection / Field evaluation reports**

Field inspection reports on skids or moveable equipment shall become part of the equipment and shall be made available on request. Report shall remain with the equipment.

Averifica	 <p>The image shows a blue and white label for 'Averifica' with the number 'S-1234567'. It includes text in English and French stating that the product is evaluated to the Model Code SPE-1000 and that the certification is an accepted form of approval. At the bottom, it says 'SPECIAL INSPECTION SERVICE' and 'SERVICE D'INSPECTION SPECIALE'.</p>		

Name of Certification Body	Certification Marks	
CSA International		The CSA certification mark alone without any identifier indicates products approved to Canadian National Standards. If another country's identifier is present (E.g. US, NRTL), then the small 'c' Canadian identifier is required to indicate that the product also complies with Canadian National Standards.
		The 'Blue Flame' certification mark is a Canada only mark indicating compliance to Canadian National Standards. They do not require a small 'c' Canadian identifier.
QPS Evaluation Services Inc.		The QPS certification mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required
FM Approvals		The FM certification mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.
Met Laboratories		The MET certification mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.
Intertek Testing Services NA Ltd. (ETL) (Entela)		The ETL Intertek Entela certification mark requires the small 'c' Canadian identifier at the 8 o'clock position to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.
		ETL Intertek Semko has 2 certification marks; the ETL mark and the WH mark. Each mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.
		
		
QAI Laboratories Ltd.		The QAI certification mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.
		The QAI Hazardous Equipment field certification will certify the equipment to the part 2 standard

Name of Certification Body	Certification Marks	
TÜV Product Service		The TÜV Product Service certification mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.
TÜV Rheinland of North America		The TÜV Rheinland certification mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.
Underwriter's Laboratory		The UL certification mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.
		
		This style of UL certification mark does not require a small 'c' Canadian identifier however; it does require the ISO country code to be part of the mark. ("Safety CA", "Safety US-CA", or "Safety US-CA-EU")
Curtis-Straus LLC		The Curtis – Straus LLC certification mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.
NSF International		The NSF International certification mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.
Nemko North America, Inc.		The Nemko North America, Inc. certification mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.

Name of Certification Body	Certification Marks		
LabTest Certification Inc.			The LabTest certification mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.
ENEFEN Energy Efficiency Engineering Ltd.			The ENEFEN certification mark is a Canada only mark indicating compliance to Canadian National Standards. It does not require a small 'c' Canadian identifier.
SGS NORTH AMERICA, INC.			The SGS North America Inc. certification mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.
Electrical Safety Authority Field Evaluation (ESAFE)			The ESAFE certification mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.
IAPMO			The IAPMO EGS certification mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.
International Testing Laboratory Inc.			The INTL certification mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.
OMNI Environmental Services Inc.**			The OMNI Environmental certification mark requires the small 'c' Canadian identifier to indicate compliance to Canadian National Standards. Identifiers for other countries may be present but, in all cases, the small 'c' is required.

Name of Certification Body	Certification Marks	
Elspect Electrical (2007) Ltd.		The EEL certification mark is a Canada only mark indicating compliance to Canadian National Standards. It does not require a small 'c' Canadian identifier.
		The EEL Hazardous Equipment field certification will certify the equipment to the part 2 standard, specifically No.s 157 and 213

## 2-024 - USE OF APPROVED EQUIPMENT - EXCEPTIONS

There may be occasions where certification standards do not exist for approval of electrical equipment. A deviation shall be applied for in accordance with Rule [2-030](#).

## LIQUID-FILLED TRANSFORMERS

In the specific situation of liquid-filled transformers, certification organizations have yet to identify a demand for developing a product certification program around this electrical equipment. Consequently, certified liquid-filled transformers are not available.

### Conditions

Owners/users required to use liquid-filled transformers are permitted to deviate from Rule 2-024 of the CEC provided they meet the following conditions:

#### 1. Manufacturing standards

##### a) Manufactured to Canadian standards

Liquid-filled transformers are acceptable when the manufacturer declares that they have manufactured, inspected, and tested the transformer to the requirements of the appropriate and current Canadian standards. These standards include, but not limited, to:

- CAN/CSA-C2.1 Single Phase and Three Phase Distribution Transformers
- CAN/CSA-C88-16 Power Transformers and Reactors
- CAN/CSA-C227.3-06(R17) Low Profile, Single Phase, Dead Front Pad-mounted, Distribution Transformers
- CAN/CSA-C227.4-06(R17) Three Phase, Dead Front Pad-mounted, Distribution Transformers

##### b) Manufactured to other than Canadian standards

- Where liquid-filled transformers are manufactured to other than Canadian standards, the manufacturer must declare that the product has equivalent safety performance as one manufactured to Canadian standards. Alternatively, a

Professional Engineer may evaluate and accept the product standard to which the liquid-filled transformer was manufactured if it compares favorably with the appropriate Canadian standards concerning safety performance.

2. Product identification

In addition to meeting the requirements of Rule 2-100 of the CEC, the liquid-filled transformer must identify the standard to which it was manufactured. The following documentation of appropriate marking must also accompany the product:

- a) a manufacturer's declaration stating that they have manufactured the product to one or more appropriate Canadian standards; or
- b) when manufactured to other than Canadian standards:
  - i) a manufacturer's declaration that the product has equivalent safety performance as one manufactured to the appropriate Canadian standards; or
  - ii) a Professional Engineer's evaluation report indicating the product as having equivalent safety performance as one manufactured to appropriate Canadian standards.

3. Maintenance

The owner of the equipment shall ensure the product is maintained to industry standards and manufacturer's specifications.

## HV DOWNHOLE ESP'S (ELECTRICAL SUBMERSIBLE PUMPS)

Manufacturers, distributors, owners and installers of ESPs and associated down-hole cables shall be permitted to deviate from Rule 2-024 of the Canadian Electrical Code provided they meet the following conditions:

### Conditions

1. Manufacturing standards

- a) Manufactured to North American Standards:

ESP's and/or associated down hole cables are acceptable when the manufacturer declares that they have manufactured, inspected, and tested the ESP's and/or associated down-hole cables to the requirements of the appropriate and current standards. These standards include but are not limited to:

  - IEEE 252 Standard Test Procedure for Polyphase Induction Motors having Liquid in the Magnetic Gap.
  - IEEE 1017 Recommended Practice for Field Testing Electric Submersible Pump Cable.
  - IEEE 1018 Recommended Practice for specifying Electric Submersible Pump Cable Ethylene-Propylene Rubber Insulation.
  - IEEE 1019 Recommended Practice for specifying Electric Submersible Pump Cable Polypropylene Rubber Insulation.
  - Manufactured to Other than North American Standards:

Where ESPs and/or associated down-hole cables are manufactured to other than North American standards, the manufacturer must declare that the product has equivalent safety performance as one manufactured to North American standards. Alternatively, a licensed engineering professional may evaluate and accept the product standard to which the ESP's and/or associated down-hole cables were manufactured to, if it compares favourably with the appropriate North American standards concerning safety performance.

## 2. Product Identification

The following documentation for ESPs and associated down-hole cables must be readily accessible:

- A manufacturer's declaration stating that the product meets industry recognized standards; and
- Specification sheets stating the product's electrical ratings and characteristics.

### 3. Additional Requirements

- The installation is bonded to ground in accordance with Section 10;
- Proper overcurrent and overload protection must be provided in accordance with the CEC, Part 1; and
- All above ground components associated with the installations meets the requirements of the CEC Part 1.

**NOTES:**

[illegible]
